

Adobe Acrobat XI Pro Intro

Overview

Communicating ideas and information is the cornerstone of organizational operations. And, electronic forms of communication have made the transfer of knowledge quick, easy, and inexpensive. The ability to harness the potential of electronic forms of communication is critical in nearly every type of organization. But, in many, if not most, organizations, people work with a wide variety of devices running on a wide variety of platforms. And sometimes, what works well or looks good on one device, won't work at all on another device.

Adobe® Acrobat® XI Pro puts the power of the Portable Document Format, literally, at your fingertips. By taking advantage of the functionality and features available in Acrobat, you will ensure the integrity of your electronic documents regardless of who views them, on what devices, or with what operating systems. And that will give the confidence and peace of mind that comes with knowing that what you meant to communicate is what your document recipients will see.

Audience

This course is for individuals who are new to Adobe Acrobat Pro, but need to create and share PDF files and PDF portfolios. Students should have some experience using office productivity applications, such as a word processor, a multimedia presentation application, or a spreadsheet application.

Duration 1 Day

Price \$350.00
